

Introducing the **Elite** composite door collection

Welcome

Our 'Elite' range of composite doors provide high security, low maintenance front and back doors with the very highest quality of finishes. Each door is carefully assembled at our UK production facilities under strict guidelines and will feature the very latest multi point locking systems, superb hardware and stunning decorative glass designs. Available in a comprehensive range of styles and finishes these doors are sure to grace the entrance to any home and add a touch of style and class.

High Security

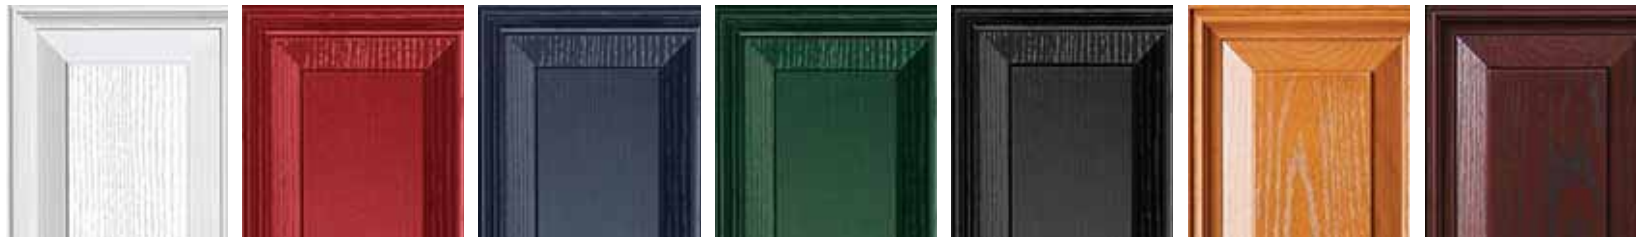

Our composite doors come fitted with Britain's best selling multi-point lock known as Yale lockmaster. This premium specification lock has been designed to deliver the very highest levels of security.

- Locks across the length of the door to secure all points soundly.
- Hook locks engage securely and can not easily be penetrated by unwanted intruders.
- Special keeps that compress the door against the gasket to maximise security.

Great choice of colours

As standard, all doors are coloured white on the inside.

We recommend that the doors supplied are supplied with a White PVCu outerframe, however, grain effects in various colours on request.

Energy Efficiency

A Doorstyle composite door helps keep the warmth in and the cold and noise out because it has a high performance insulating core.

The insulated core is made up of a high density CFC- free PV foam which is environmentally friendly with a Global Warming Potential of less than five and an Ozone depletion score of zero. The product installed far exceeds the requirements of approved Document L of the Building Regulation.

You might also like to know that the Doorstyle composite doors are proven to the BS-6375-1 classification for weather tightness, air, wind and water, providing peace of mind that you are protected from the elements.

Quality and Assurance guaranteed...

We are so confident in the quality of our workmanship, that we offer a fully comprehensive, 10 year manufacturer's guarantee with every Doorstyle door.

Practically maintenance free...

Every Doorstyle door is manufactured from technically advanced GRP (Glass Reinforced Polyester) which is not only impervious to twisting, warping and swelling, but also provides a thermal efficiency which is up to nine times that of a timber door.

Contemporary living at an affordable price.

- We are proud to introduce a range of modern composite doors offering cutting edge luxury and style at a very affordable price. Unique glazing options and sleek door lines combine to dramatic effect.

Security is at the very core of each of our bespoke composite doors.

- The latest multi-point locking systems help prevent forced entry.
- Toughened safety glass comes as standard with each door and laminated upgrades are available to 'Secured By Design' specifications.
- A durable GRP outer shell and filled core make each door far stronger than PVC panel doors.

Doors designed for the hottest of summer days to the harsh chill of a winters night.

- Modern materials mean that our doors will not bow or warp as can often happen with timber doors.
- A composite door is far more energy efficient than most conventional alternatives saving money on heating bills.
- A highly durable GRP outer skin keeps moisture locked out and keeps your home warm and secure.
