

VEKA

FULLY REVERSIBLE WINDOW

180 degrees of clarity.

Fully reversible windows are a sleek alternative to sliding or tilting windows. You'll have convenient access to both sides of the window through a fully rotating panel designed to support easy cleaning and everyday use. Enjoy the advantages of reversible windows as they help reduce external noise and allow fresh air and sunlight into your home.

Features & Benefits

Designed for great thermal performance to support comfort throughout your home.

180-degree reversible opening for easy and safe cleaning of external glass

Tested weather performance to help protect your home from the elements.

Can be specified to meet PAS 24 requirements when using compatible hardware tested to BSI standards.
